Post-Emergent Herbicide

Dual powered post-emergent herbicide for tough broadleaf weed problems in established cool and warm season non-residential turfgrass. A single application delivers eight to 12 weeks of truly reliable control of dandelion, oxalis, clover and other difficult to control weeds.

- ▶ Dynamic combination of triclopyr and clopyralid provides to the root control of 35 broadleaf weed species
- ▶ A single application provides long-lasting, broad-spectrum control that helps eliminate repeat treatments
- ▶ Labeled for use on a wide variety of cool and warm season turfgrass with a low-odor formulation that's excellent for commercial and public applications

Formulation	A non-phenoxy post-emergent liquid
Active Ingredient	Triclopyr and Clopyralid
Competitive Brand	Dow AgroSciences Confront®
Packaging	4 x 1 gallon bottles
Application Rates	See label for specific uses and rates
Mode of Action	Post-emergence selective systemic broadleaf herbicide which controls target weeds by mimicking the plant hormone auxin causing uncontrolled plant growth.
Signal Word	Danger
