3-D

Post-Emergent Herbicide

Excellent selective control of broadleaf weeds in turfgrass on golf courses, residential turf and sod farms as well as non-crop areas such as highways and rights-of-way. A combination of two phenoxy herbicides and dicamba, 3-D provides proven control of common broadleaf weed problems including dandelion, clover, henbit, and plantains.

- ▶ Powered by a 3-way combination of active ingredients: 2,4-D, mecoprop-p and dicamba for dependable broadleaf weed control
- ▶ Ideal for both cool- and warm-season turf
- ▶ Flexible use rates for problem control and maintenance applications and compatible for tank-mix with most liquid fertilizers and iron
