

# Add Up the Value of Border™ Adjuvant Technology

Border's unique, patented technology simulates higher water volumes by delivering and sticking more spray droplets on target weeds while providing superior weed control compared to ordinary adjuvants. This allows custom applicators and growers the ability to reduce spray volumes and receive real bottom line value by covering more acres per day.

## *More Acres Sprayed in Less Time*

- Cover at least 10% more acres per day
- Spend less time filling, more time spraying
- Do more with the same or less equipment investment

## *+ More Performance*

- More consistent performance under a wider range of weather conditions
- Better performance against tough weeds like velvetleaf, lambsquarter and tall waterhemp
- Less chance of costly, unbudgeted resprays
- Proven superior drift control

## *+ More Convenience*

- Easy-to-use, liquid or dry formulations
- Border Xtra liquid formulations include surfactant to reduce tank mixing and save money
- Compatible with all glyphosate formulations...loaded or unloaded

---

*= Border's Bottom Line Value for You and Your Growers!*

# Add up the Border™ Value

## Dealer Value Worksheet

Acres sprayed per day at current GPA \_\_\_\_\_ (A)

Efficiency gain from reducing GPA by 30% with Border technology 10% (B)

Additional acres covered each day ( $A \times B$ ) \_\_\_\_\_ (C)

Custom application average charge per acre \_\_\_\_\_ (D)

Additional revenue per sprayer per day ( $C \times D$ ) \$ \_\_\_\_\_

## Grower Value Worksheet

Acres sprayed per day at current GPA \_\_\_\_\_ (A)

Efficiency gain from reducing GPA by 30% with Border technology 10% (B)

Additional acres sprayed each day ( $A \times B$ ) \_\_\_\_\_ (C)

Additional acres sprayed over 3 days ( $C \times 3$ ) \_\_\_\_\_ (D)

Yield loss prevented by not being rained-out for \_\_\_\_\_ week(s)<sup>1</sup> \_\_\_\_\_ bushels (E)

Market value of a bushel of soybeans \$ \_\_\_\_\_ (F)

VALUE delivered by Border technology ( $D \times E \times F$ ) \$ \_\_\_\_\_

<sup>1</sup>University research shows a 1-bushel yield reduction for every inch in weed growth.  
How many inches will your weeds grow in one week?
