

**THE CLOSER
YOU LOOK,
THE BETTER
IT LOOKS!**

Micro is a low growing Turf Type Tall Fescue. It has an exceptional fine texture and a dark green genetic color.

Micro exhibits excellent resistance to turf diseases and pests. Plus, it performs well in full sun or shady areas.

Add in a deep root system for improved heat and drought tolerance, and Micro is truly a turfgrass that requires less fertilizer, less water, less mowing, and less maintenance.

If you want excellent turf quality, look closer at Micro "low growing" Turf Type Tall Fescue.
